KOPARKI · DIVE PLAN

MAGNETIC bearings (diver's compass) · distances in metres · orthophoto from 13 Sep 2026

1 Water entry
steps and ladder by the base

2 Jetty I

3 Jetty II

4 Jetty III

5 Pool
floating platform with a pool

6 Star (truck)

7 WILHELM wreck
15 m* · guideline from 9 tied here; 7b bow

8 Transformer

9 Deep excavator
15 m*

10 Buckets

11 Cadillac

12 Bridge
18.5 m*

13 Shallow excavator
12 m*

14 Explosives store

15 Pumping station
shadow visible underwater

16 Pontoon bridge
visible just below the surface

17 Training platform I
5 m* · visible below the surface

18 Training platform II
5 m* · visible below the surface

19 Corridor
sunken L-shaped jetty

20 Mirrors
visible on the bottom, in the shallows on the NW side

At each line: bearing at the point you swim from (the arrow shows the direction), distance in the middle.
Declination +6.3°E (WMM, IX.2026), true bearing = magnetic + 6°. The "to shore" panel works from anywhere in the lake, ±5°.
* Depth depends on the water level.
Positions of sites determined from buoy locations may be slightly offset.
Training platforms (17, 18) are shown as small points without their own lines; they lie by routes 5–19 and 16–19. A bearing gives direction, not a precise aim.
Wilhelm: 7 is where the guideline from 9 is tied, 7b the bow. Hull approx. 16.5 × 3.5 m, stern→bow 90°.
